SUMMARY

Results-driven Web3/Solidity Engineer skilled in the end-to-end software development life cycle for blockchain applications. Proven expertise in designing, implementing, and deploying secure, scalable decentralized applications. Proficient in Solidity and Web3 protocols, with strong competence in smart contract engineering, architecting, and security. Adept at ensuring robustness and resilience against vulnerabilities while optimizing performance. Collaborative and innovation-driven, committed to staying abreast of emerging trends and contributing to all phases of development, from conceptualization to deployment.

EDUCATION;

Solidity & Smart contract security. - Cyfrin Updraft.

CORE COMPETENCIES;

Programming - Js, Ts, solidity, FunC.

Smart contract Engineering.

Smart contract Security.
